

INTEGRATION CLOSURE RECORD

Illustrative working artifact - not an internal Latitude form

LATITUDE AI

SYSTEM COHERENCE

Purpose: make a cross-domain issue explainable enough to reproduce, decide, repair, validate, and learn from.

ISSUE / PLATFORM / FEATURE / BUILD	RELEASE CONSEQUENCE / DECISION OWNER
OBSERVED BEHAVIOR - FACTS ONLY	
EXPECTED SYSTEM BEHAVIOR / INVARIANT	CONFIDENCE / UNKNOWNNS
MINIMUM REPRODUCIBLE CONDITION: software, firmware, calibration, hardware, network, environment, data, timing	
LIKELY VIOLATED INVARIANT	COMPETING HYPOTHESIS
NEXT DISCRIMINATING EXPERIMENT: change one meaningful condition; pre-state expected evidence	
TECHNICAL AUTHORITY	INTEGRATION OWNERSHIP
REPAIR AND ADJACENT-RISK REVIEW	
RELEASE EVIDENCE: before/after reproduction, targeted test, system validation, configuration identity, approval	
CLOSURE DECISION / OWNER / DATE	LEARNING TO RETAIN

CLOSURE CHECKS

- [] Find the fracture
- [] Establish the invariant
- [] Restore the coupling
- [] Make recurrence harder
